File Ext.	Title	Tags
☐ JPG ▼	img_2343	USA ▼ beach ▼ miami ▼
□ HTML ▼	meeting	bmw → 20140214 → john →

Optional space for visual separation of the tag area

Mandatory space charecter used for tag separation

File extension. Common length is 3 to 4 characters

Filename [tag1 tag2 smarttag1].extension

Opening bracket "[" marks the begin of the tag area

The original name of the file. Ideally this string should be a title for the content of the file.

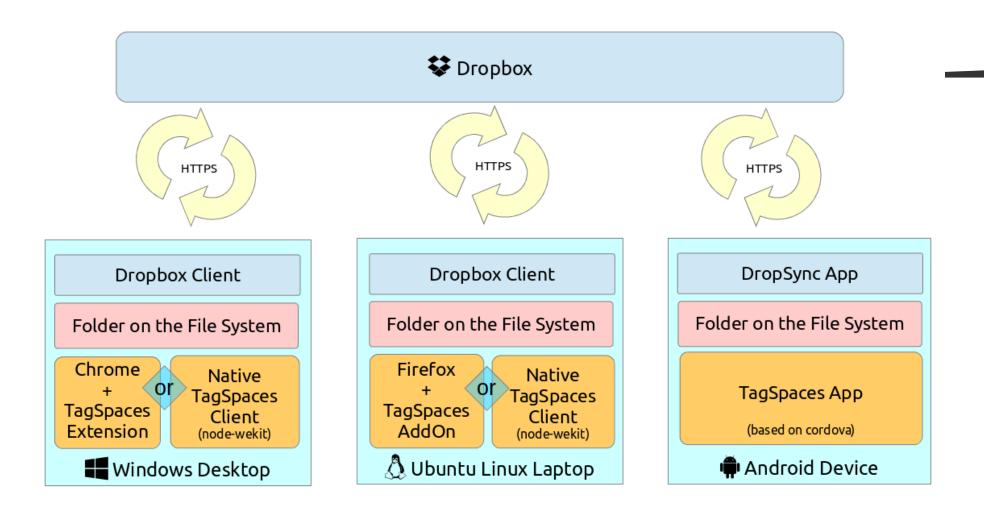

Closing bracket "]" marks the end of the tag area

A Tag

Smarttag: A special kind of tag, which encodes in his name the type of the described information. e.g. "20EUR" encoding the amount of zwanazig in the euro currency
